E-Learning 2.0: What It Means, Where It's Going

Stephen Downes February 21, 2008

What does learning 2.0 mean to me?

What does Learning 2.0 mean for a learner?

Three Views of Learning Resources:

1. Learning Resources as a thing

-Book, content object, etc

2. Learning Resources as events

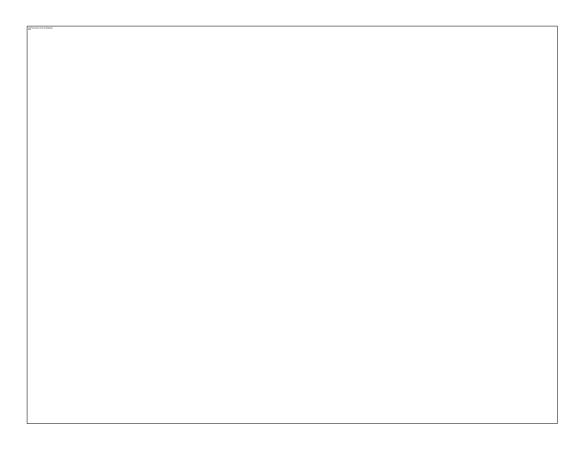

-Class, lecture, seminar, meeting

- The first two models are information-theoretic and medium-based models
 - -They stress *content*
 - -They stress *rules*

3. Learning Resources as *flow*

- Stresses experience
- Stresses pattern recognition

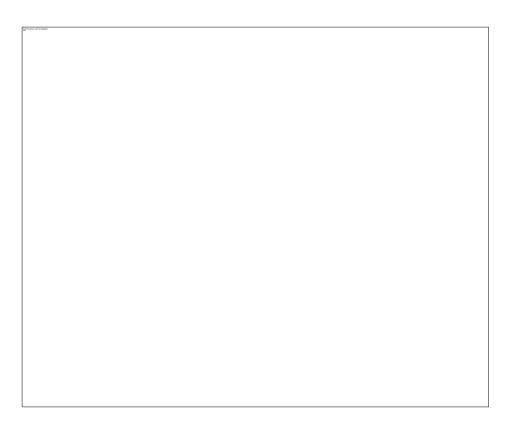

What does this look like?

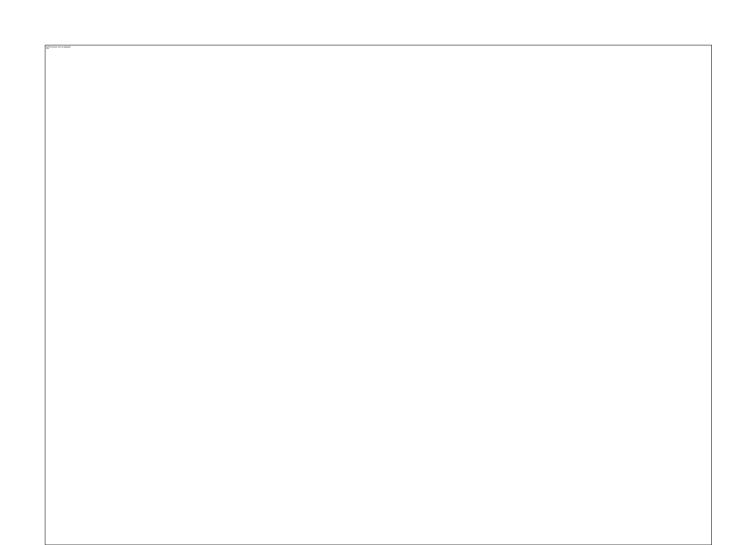

- User generated Content
 - -Personal, opinionated

Network of interactions

Immersive Learning

New Roles

- For students as creators of learning
- For teachers as coaches and mentors
- For the rest of us as teachers

Issues:

- Too much information, filtering info
- Too many sources to scan, new sources
- Localization, personalization, relevance

Learning as a network phenomenon...

 Web of user-generated content (eg. Wikipedia)...

http://www.wikipedia.org

•	Social networks and communities (entails a genuinely portable (an owned) identity		

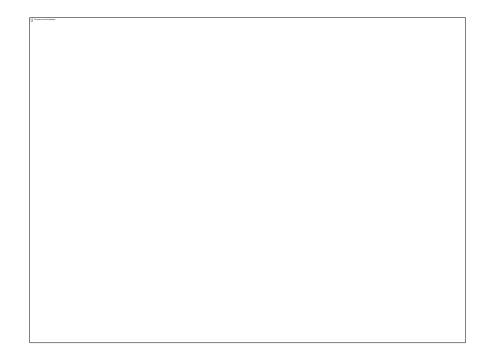

http://www.facebook.com

Networks of interactions
 (aggregate, remix, repurpose, feed forward) – syndication

An ecology...

The personal learning centre

 The Network is Diverse – multiple views, multiple technologies The Network is connected and interactive (not 'integrated') – small pieces, loosely joined • The Network is open

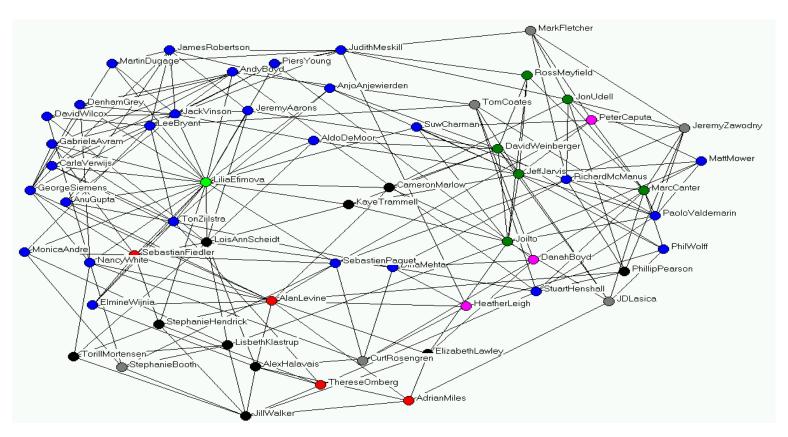

What are the key technologies at play?

Web 2.0 - Core Technologies

Tools for worldmaking...

Social Networking
