

# Recent Work in Connectivism

Stephen  
Downes

March 4, 2019

# How Connectivism is Being Interpreted

- ▶ Nature of Knowledge
- ▶ Learning Process
- ▶ Network Formation
- ▶ Autonomy and Decision-Making

*Table 12.1* Principles of **connectivism**.

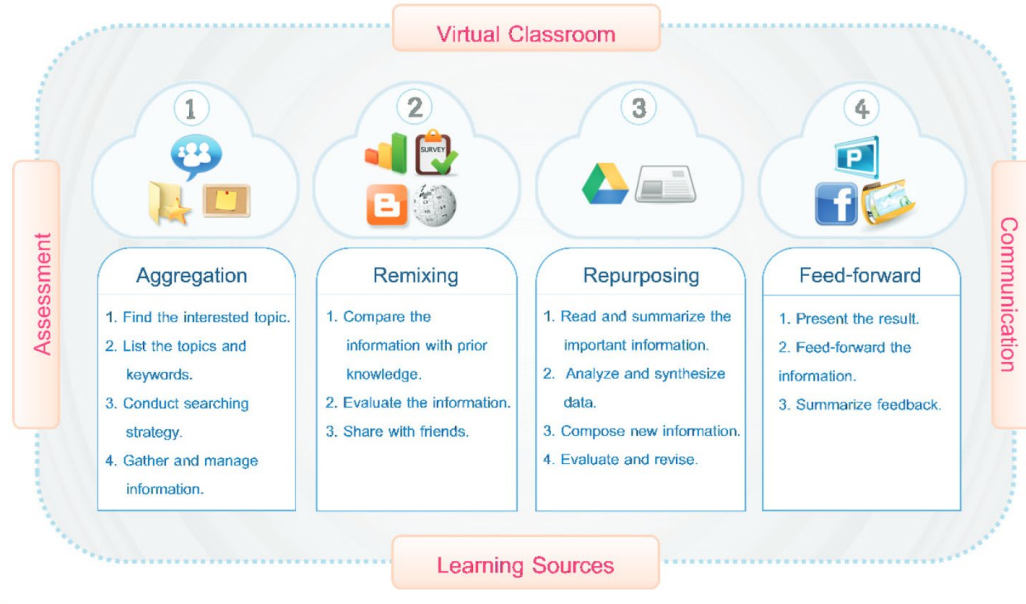

- 
1. Learner connects to a learning community. They benefit from it but also feed it with new information. Continuous dialogue between members.
  2. A community is a node, part of a community of nodes that support a wider network. Networks encourage diverse, autonomous and creative knowledge building.
  3. Diversity is strength. Knowledge resides within the individual; therefore, diversity of individuals in a network enriches the knowledge available to the learners.
  4. Information/knowledge is constantly changing. The network acts as a filter, constantly evaluating what is of worth, to retain and circulate within the network.
  5. Networks situated in the internet have access to diverse sources of information. Therefore, networks are inter-disciplinary by nature.
- 

(Bowes and Swanwick,  
2018)

# How Connectivism is Being Interpreted

*Kulachai Kultawanich et al. / Procedia - Social and Behavioral Sciences 191 (2015) 87 – 92*

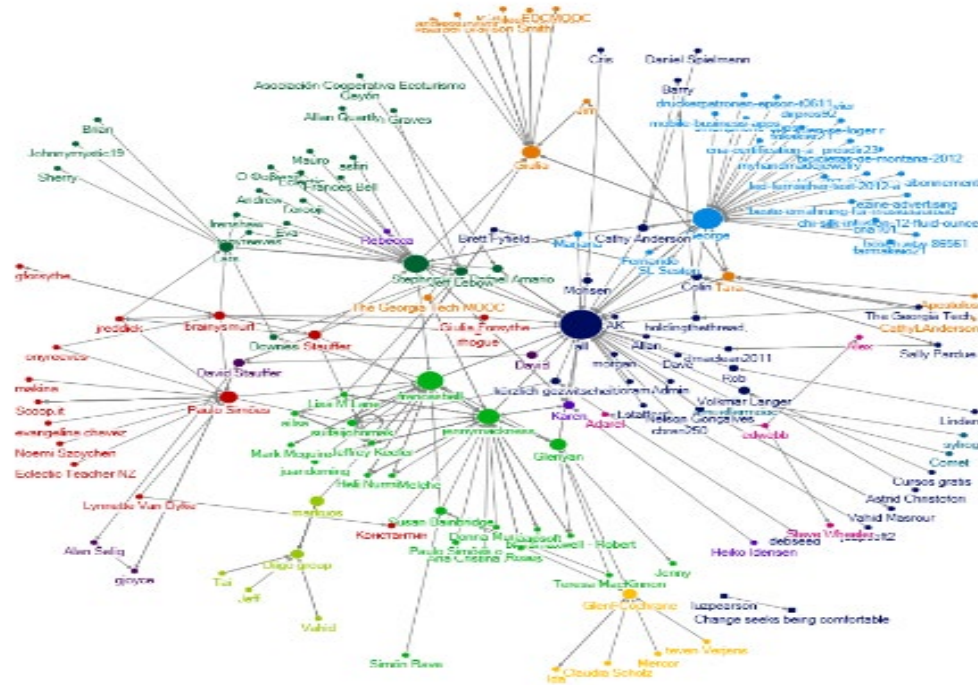

- ▶ Nature of Knowledge
- ▶ Learning Process
- ▶ Network Formation
- ▶ Autonomy and Decision-Making

(Kultawanicha, Koraneekija, and Na-Songkhlaa, 2015).

# How Connectivism is Being Interpreted

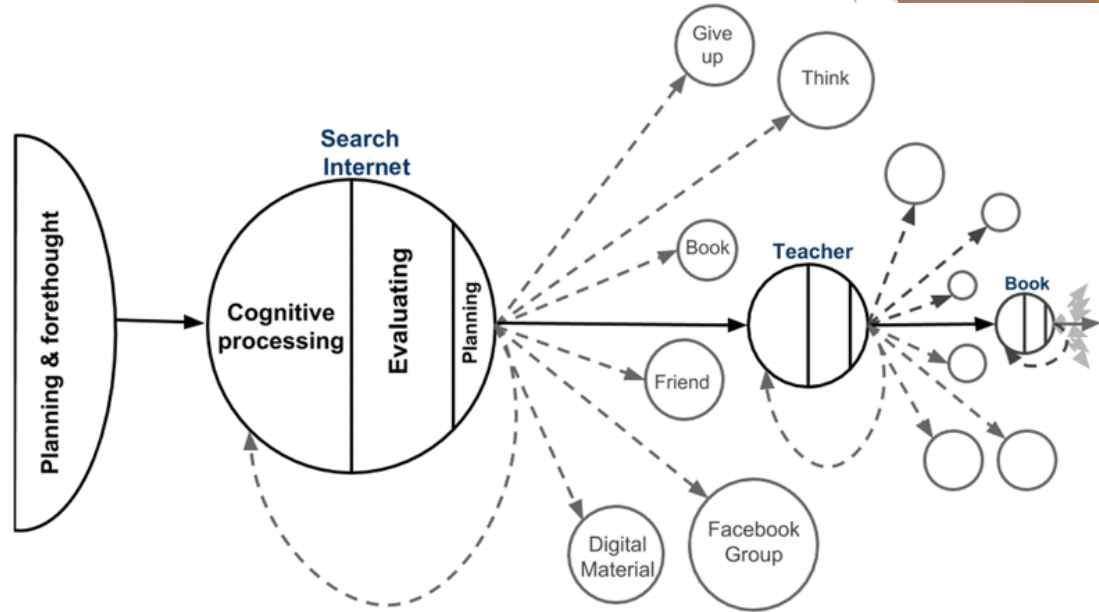

- ▶ Nature of Knowledge
- ▶ Learning Process
- ▶ Network Formation
- ▶ Autonomy and Decision-Making

(Wang, Anderson and Chen, 2018)

# Criticisms of Connectivism

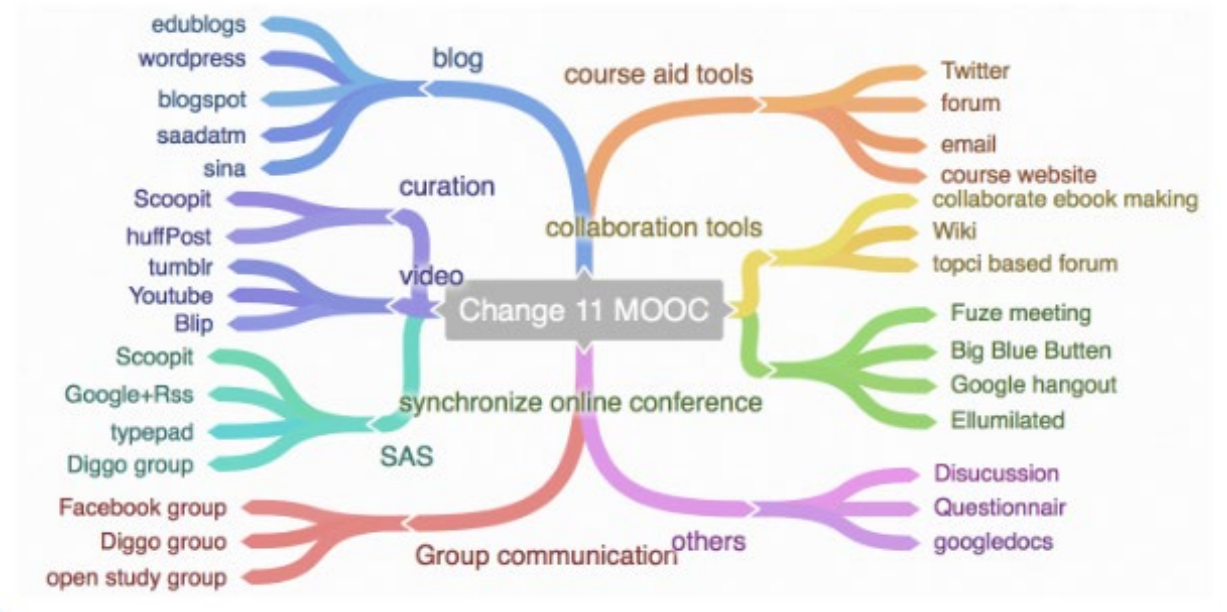

- ▶ Inability to Self-Direct
- ▶ Disconnection, demoralization

(AlDahdouh,  
2018)

# Connectivism as Pedagogy

- ▶ MOOCs
- ▶ Open Learning
- ▶ Active Learning
- ▶ Microlearning

(Wang, Anderson and Chen, 2018)

# Connectivism as Pedagogy

- ▶ MOOCs
- ▶ Open Learning
- ▶ Active Learning
- ▶ Microlearning

Table 1. Aims and pedagogical foundations of the activities in the course

| Type of task   | Type of activity           | Aim   | Pedagogical foundation<br>(connectivism)                                       |
|--|----------------------------|---|--|
| Forum discussion   | Collaborative              | Collaborative space to share and reflect                  | Building knowledge from diverse opinions                                       |
| Online synchronous discussions   | Collaborative              | Direct communication with peers and tutors                | Strengthen connections among participants                                      |
| Creation of learning material using and reusing open educational resources | Individual                 | Tailored learning materials adapted to each learner needs | Building participants' capacity to learn                                       |
| Sharing learning materials created and/or researched by the learners       | Individual + Collaborative | Providing self-created and used learning resources        | Connecting information sources   |
| Questionnaires and activities of self-reflection                           | Individual                 | Self-reflection and awareness of their learning needs     | Developing participants' ability to see connections between concepts and ideas |

(Fondo and Konstantinidis, 2018)

# Connectivism as Pedagogy

- ▶ Collaboration / Cooperation
- ▶ Personal Learning Networks
- ▶ Global Learning

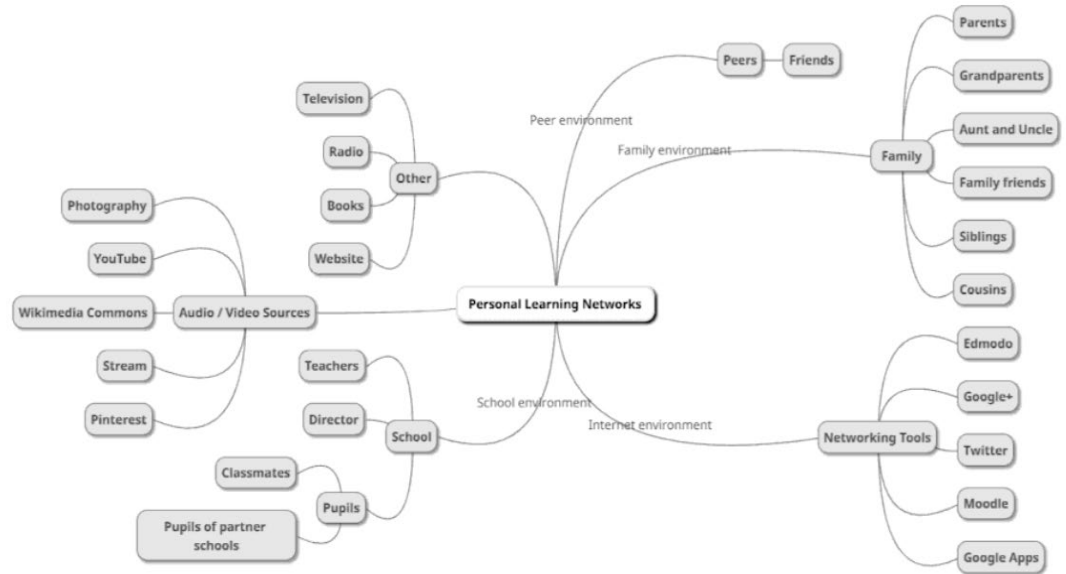

Figure 4: Personal learning networks

(Homanova, et.al.,  
2018)

# Connectivism as a Theory of Learning

- ▶ Arguments that it's Not
- ▶ Does Not Explain Concept-Formation
- ▶ Does Not Explain Teaching
- ▶ Responses

Figure 1: Linear historical evolution of learning theories? (Altuna Urdin 2017)

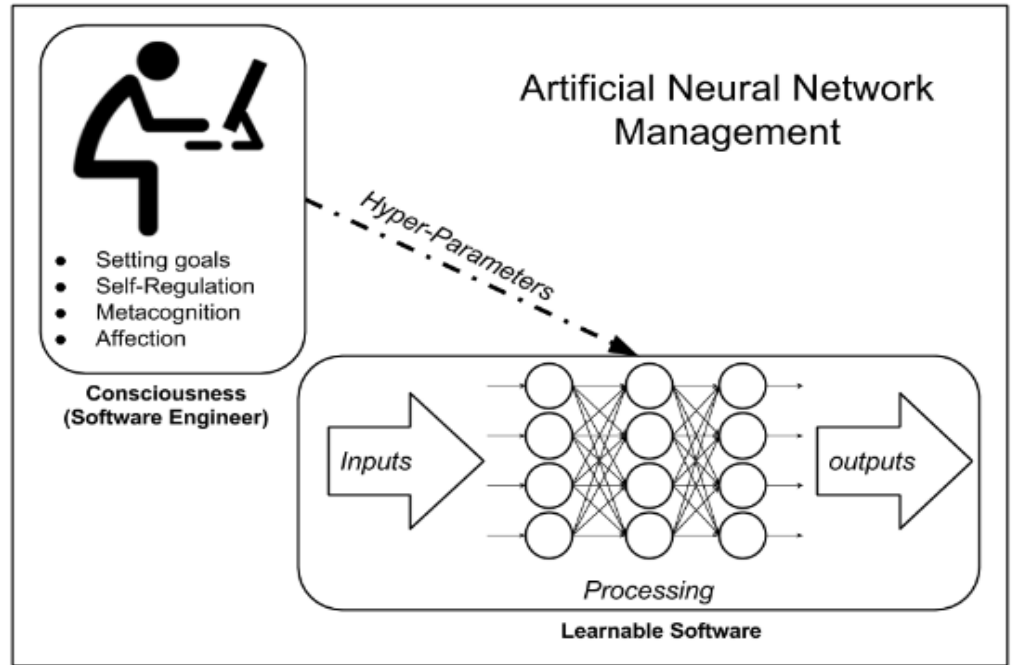

Figure 2: Connectivism by Tracey (2009)

# Connectivism as a Theory of Learning

- ▶ Arguments that it's Not
- ▶ Does Not Explain Concept-Formation
- ▶ Does Not Explain Teaching
- ▶ Responses

# Basis for Connectivism in Research

- ▶ Psychology
- ▶ Neuroscience
- ▶ Connectionism
- ▶ Education
- ▶ Chaos Theory
- ▶ Complex Adaptive Systems
- ▶ Sociology

Fig. 7 Recurrent neural network

(AlDahdouh,  
2018)

# Evidence for Success

- ▶ Improved motivation
- ▶ Improved ability to learn
- ▶ Reduction of errors
- ▶ Performance improvements

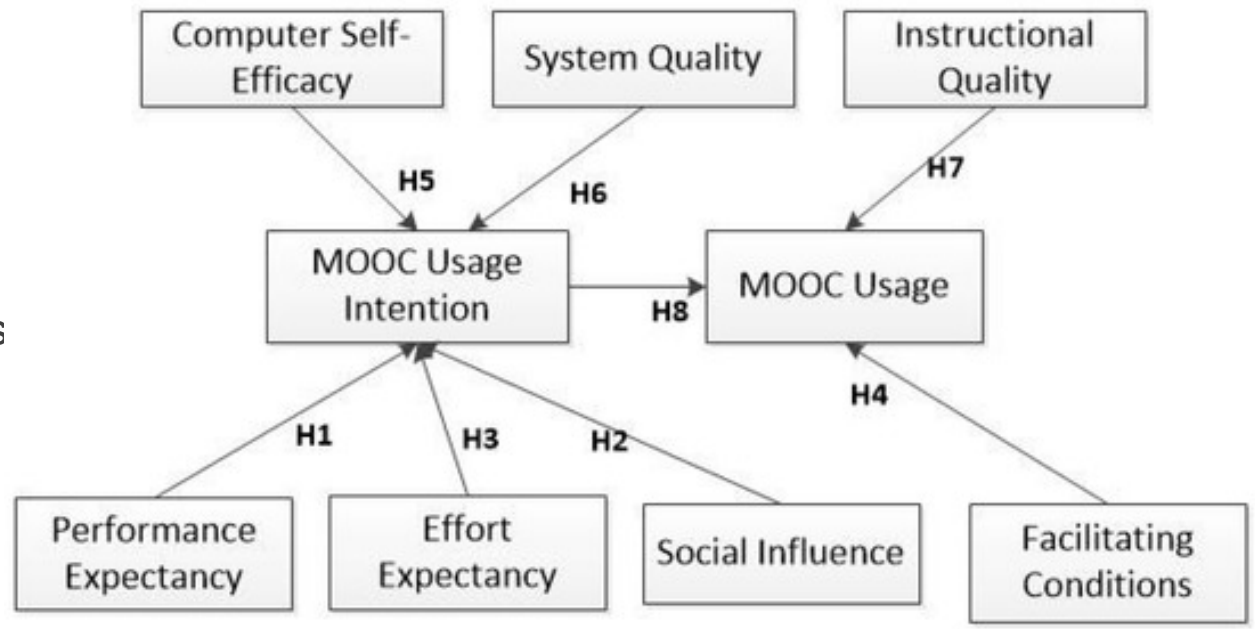

Fig. 3. Example of homework solution discussed in the class by the teacher: formation of an imine.

(Angelini and Gasbarri,  
2018)

# Evidence for Success

- ▶ Improved motivation
- ▶ Improved ability to learn
- ▶ Reduction of errors
- ▶ Performance improvements

(Fianu, et.al., 2018)

# Evidence for Success

- ▶ Improved motivation
- ▶ Improved ability to learn
- ▶ Reduction of errors
- ▶ Performance improvements

Table 2.

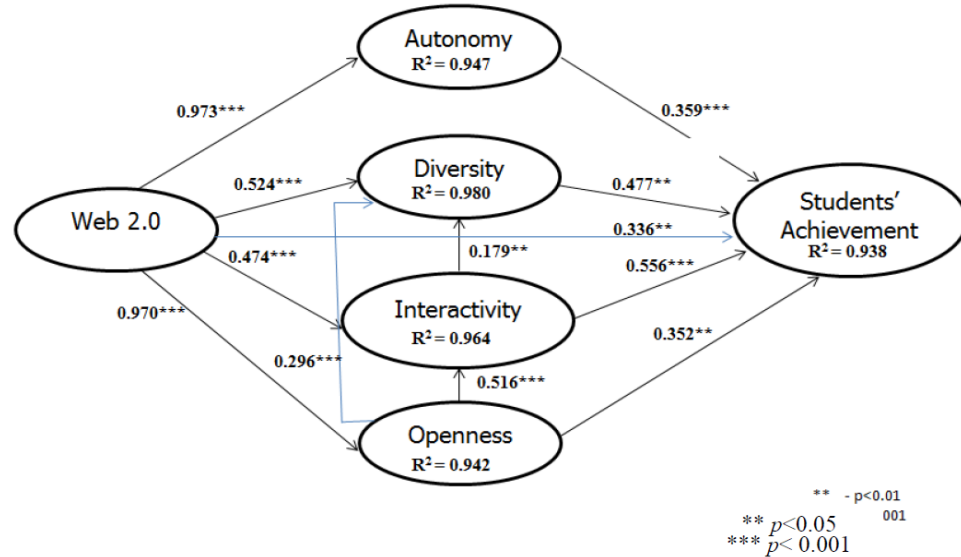

Figure 1: PLS-SEM Results Estimated for the Structural Model

(Zulkifley Mohamed and Nor Ubaidullah and Siti Yusof, 2018)

# Moving Forward

- ▶ Critical Thinking and Deep Learning
- ▶ Rhizomatic Learning
- ▶ Social Networking
- ▶ Cognitive Cities

**Fig. 1** Connectivism  
(following Siemens 2006)

(Tabacchi, et.al.,  
2018)

# Thinking of Connectivism More Widely

- ▶ Building Relationships
- ▶ Distributed Cognition
- ▶ Co-Creation

Austen, Chen, Darlington, Daylamani-Zad, De'Cage and Farrant, 2014
